Summary

Computer Science undergraduate (2027) with an interest in Full Stack Development and AI/ML. Strong foundation in DSA, OOP, and DBMS, with a passion for building scalable applications and learning emerging technologies.

Education

KPR Institute of Engineering and Technology, Coimbatore , BE Computer Science and Engineering	2023 - 2027
• CGPA: 8.9	
Jai Saradha Matric HR Sec School, Tiruppur	2021 - 2023
• HSC: 93.16%	

Experience

NITTTR Underwater Research	Jan (2026)
• Designed and evaluated computer vision solutions with a focus on creating intuitive outputs and improving the usability of AI-driven applications.	
Tekfilo Full Stack Development Intern	Jan–Feb (2025)
• Developed responsive full-stack applications, integrated REST APIs, and collaborated with the team to build scalable web solutions.	
Reccsar Private Limited Backend Development Intern	Jun–Jul (2024)
• Developed backend functionalities using REST APIs, database operations, and API testing.	
Teachnook Frontend Development Intern	Mar–Apr (2024)
• Built responsive user interfaces using HTML, CSS, JavaScript.	

Skills

Languages: Java, JavaScript, HTML, CSS

Frameworks & Technologies: React.js, Flutter, Node.js, Express.js, REST APIs, Firebase

Databases: MongoDB, MySQL

Core Concepts & Tools: Data Structures & Algorithms, Object-Oriented Programming, Git, GitHub

Projects

Railway Navigation System Full Stack Web Application	Github
• Built a railway navigation platform with route search, REST API integration, and a responsive interface to improve station and train navigation.	
Mobile App for Direct Market Access for Farmers	Github
• Developed a cross-platform mobile application connecting farmers and buyers with product listings, authentication, and real-time data management.	
Underwater Species Detection and Classification	Github
• Developed a CNN-based image classification model using Python, PyTorch, and OpenCV, achieving 90% classification accuracy on underwater species.	
Atmospheric Water Generator	
• Designed and prototyped a portable solar-powered atmospheric water generator using Peltier technology, securing a Top-10 position at INNOVASENCE.	

Achievements

- Solved **300+ Data Structures and Algorithms** problems on **LeetCode** and completed certifications in **Java DSA**, **Cyber Security and Privacy**, and **Learning Analytics Tools**.
- Advanced to the second round of the **Smart India Hackathon (SIH)** and secured a **Top 10** position at **INNOVASENCE** for the **Atmospheric Water Generator** project.

Publications

- **Bias Mitigation Strategies in AI-Powered Threat Detection for Autonomous Robotics** – Co-authored a research paper on fairness-aware AI, exploring machine learning, bias mitigation, and ethical AI techniques for autonomous robotic threat detection.

Language Proficiency

- Tamil (Native), English (Fluent), Japanese (Basic – Reading & Writing)
